Fund Objectives

Japan Smaller Capitalization Fund, Inc. ("JOF" or the "Fund") is a non-diversified, closed-end management investment company listed on the New York Stock Exchange. The Fund's investment objective is to provide shareholders with long-term capital appreciation and to invest, under normal circumstances, at least 80% of its total assets in smaller capitalization Japanese equity securities traded on the Tokyo, Nagoya, and JASDAQ Stock Exchanges, the Mothers, Centex Markets, and other indices

or markets determined by the investment adviser to be appropriate indices or markets for smaller capitalization companies in Japan. Nomura Asset Management U.S.A. Inc. has served as the Fund's Manager since the Fund's inception in 1990. Nomura Asset Management Co., Ltd. has served as the Fund's Investment Adviser since the Fund's inception. The Manager and Investment Adviser are subsidiaries of Nomura Holdings, Inc. and affiliates of Nomura Securities Co., Ltd., Tokyo, Japan.

Performance Overview (as of 12/31/2017)

Manager's Commentary

The Japan equity market extended its upward momentum, and the TOPIX Index gained 1.4% in December 2017 and 8.5% for the fourth quarter of 2017. Corporate tax reforms in the US are expected to underscore a broadly positive outlook for the world's largest economy and its currency, which should be supportive for Japanese exporters. A pause in the on-going US – North Korean tensions provided some relief for investor sentiment in Japan.

Recent data announcements in December suggest that steady growth in the Japanese economy looks set to continue. The Industrial Production Index increased by

0.6% (mom) in November 2017, outpacing the consensus estimate of +0.5%. Robust global demand for semiconductors seems to be supporting Japanese production activity. Domestic demand conditions also appear sound. Real household consumption growth returned to positive territory, rising by 1.7% (yoy) in November 2017. The unemployment rate sank to just 2.7% in November 2017, the lowest figure in 24 years. On the back of the tight labour conditions, real household disposable income from employment grew by 2.7% (yoy) in November 2017.

The leading industry sector this month was Commodities. Along with a positive global

economic growth outlook, the prospect of oil producing countries tightening supply even further helped to boost sentiment among commodity related stocks. On the other hand, the Communication sector endured a major sell off amid fears of stiffer price competition in the industry after Rakuten, a leading electronic commerce service provider, revealed its intention to enter the market as the fourth mobile phone carrier to operate its own network.

Additional Information

Comparisons between changes in the Fund's net asset value or market price per share and changes in the Fund's benchmark should be considered in light of the Fund's investment policy and objective, the characteristics and quality of the Fund's investments, the size of the Fund, and variations in the Japanese Yen/U.S. Dollar exchange rate.

This report is for informational purposes only. The financial information is taken from the records of the Fund without examination by independent accountants. The portfolio information found in this report is as of the date of this brochure and is subject to change at any time without notice. This report is not a prospectus, circular or representation intended for use in the sale of shares of the Fund or of any securities mentioned in this report. Past performance is not indicative of future results. Current performance may be lower or higher than the performance presented. Investment products offered are not FDIC insured, may lose value, and are not bank guaranteed.

The Russell/Nomura Small Cap™ Index represents approximately 15% of the total market capitalization of the Russell/Nomura Total

Market™ Index. It measures the performance of the smallest Japanese equity securities in the Russell/Nomura Total Market™ Index. The Nikkei JASDAQ Index is a capitalization-weighted index of all Japanese over-the-counter stocks. The Tokyo Stock Price Index (TOPIX) is a market capitalization-weighted index of all companies listed on the First Section of the Tokyo Stock Exchange. Any performance quoted should not be viewed as a representation of future investment performance. There is a risk of loss. One cannot invest directly in an index.

Statements concerning financial market trends are based on current market conditions, which will fluctuate. There is no guarantee that these investment strategies will work under all market conditions, and each investor should evaluate their ability to invest for the long term.

Forward Looking Statements. Certain information discussed in this factsheet may constitute forward-looking statements within the meaning of the U.S. federal securities laws. Although the Investment

Manager of the Fund believes that the expectations reflected in such forward-looking statements are based on reasonable assumptions, it can give no assurance that its expectations will be achieved. Forward-looking information is subject to certain risks, trends, and uncertainties that could cause actual results to differ materially from those projected.

The Fund may participate in new issuances of securities ("New Issues"), and a portion of the Fund's returns consequently may be attributable to its investment in New Issues. The market value of New Issues may fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, and the limited availability for trading and limited information about the issuer. When a composite's asset base is small, New Issues may have a magnified impact on the Fund's performance. As a fund's assets grow, it is probable that the effect of the composite's investment in New Issues on its total returns may not be as significant, which could reduce the Fund's performance. There is no guarantee that the availability or economic attractiveness of New Issues will be consistent from year to year.
