Fund Objectives

Japan Smaller Capitalization Fund, Inc. ("JOF" or the "Fund") is a non-diversified, closed-end management investment company listed on the New York Stock Exchange. The Fund's investment objective is to provide shareholders with long-term capital appreciation and to invest, under normal circumstances, at least 80% of its total assets in smaller capitalization Japanese equity securities traded on the Tokyo, Nagoya, and JASDAQ Stock Exchanges, the Mothers, Centex Markets, and other indices

or markets determined by the investment adviser to be appropriate indices or markets for smaller capitalization companies in Japan. Nomura Asset Management U.S.A. Inc. has served as the Fund's Manager since the Fund's inception in 1990. Nomura Asset Management Co., Ltd. has served as the Fund's Investment Adviser since the Fund's inception. The Manager and Investment Adviser are subsidiaries of Nomura Holdings, Inc. and affiliates of Nomura Securities Co., Ltd., Tokyo, Japan.

Manager's Commentary

Japanese equities rebounded in January as the TOPIX index gained 4.91% to partially erase the December losses. While the US-China trade dispute remains unsolved and the global economy seems to be slowing down, the extent of the sell-off last year apparently reflected an excessively pessimistic outlook for the global economy and Japanese corporate sector. However, a more accommodative stance toward the policy rate hikes revealed by Fed Chairman Jerome Powell triggered a rapid turnaround in market sentiment. Economic data has also failed to suggest anything like a severe 2008-style global downturn and there has been no worsening of trade conditions in recent weeks. Therefore, Japanese stocks were able to recoup some of their losses from the previous quarter as international investors scaled back their net selling, especially towards the month end.

Recent economic data suggest the Japanese economy is levelling out. Reflecting a slowdown in global demand, the Industrial Production Index declined by 0.1% (MOM) in December 2018, although the analysis of forecast report points to a recovery in production activity in February. Domestic demand trends are also unclear. Seasonally adjusted retail sales recovered, with growth of 0.9% (MOM) in December 2018. The Bank of Japan left its current monetary policy unchanged but revised down the inflationary outlook for Japan while making no change to its cautiously positive economic outlook.

Excluding Consumption, all sectors rebounded in January as fears of a disruptive economic slowdown abated. Electronics stocks led the recovery, with semiconductor manufacturing equipment producers rebounding from the steep sell off last year.

Communication stocks also rallied as price competition concerns in the mobile phone sector seemed to be priced in after the fourth quarter sell off. Softbank Group led the sector as prospects for its investment business recovered along with global market conditions. The Information/System sector rally was led by gains in major video game companies. Consumption also lagged after outperforming in 4Q2018, while some companies in the sector revealed weak earnings results due to flattening domestic demand and rising labor costs.

Additional Information

Comparisons between changes in the Fund's net asset value or market price per share and changes in the Fund's benchmark should be considered in light of the Fund's investment policy and objective, the characteristics and quality of the Fund's investments, the size of the Fund, and variations in the Japanese Yen/U.S. Dollar exchange rate.

This report is for informational purposes only. The financial information is taken from the records of the Fund without examination by independent accountants. The portfolio information found in this report is as of the date of this brochure and is subject to change at any time without notice. This report is not a prospectus, circular or representation intended for use in the sale of shares of the Fund or of any securities mentioned in this report. Past performance is not indicative of future results. Current performance may be lower or higher than the performance presented. Investment products offered are not FDIC insured, may lose value, and are not bank guaranteed.

The Russell/Nomura Small Cap™ Index represents approximately 15% of the total market capitalization of the Russell/Nomura Total

Market™ Index. It measures the performance of the smallest Japanese equity securities in the Russell/Nomura Total Market™ Index. The Nikkei JASDAQ Index is a capitalization-weighted index of all Japanese over-the-counter stocks. The Tokyo Stock Price Index (TOPIX) is a market capitalization-weighted index of all companies listed on the First Section of the Tokyo Stock Exchange. Any performance quoted should not be viewed as a representation of future investment performance. There is a risk of loss. One cannot invest directly in an index.

Statements concerning financial market trends are based on current market conditions, which will fluctuate. There is no guarantee that these investment strategies will work under all market conditions, and each investor should evaluate their ability to invest for the long term.

Forward Looking Statements. Certain information discussed in this factsheet may constitute forward-looking statements within the meaning of the U.S. federal securities laws. Although the Investment

Manager of the Fund believes that the expectations reflected in such forward-looking statements are based on reasonable assumptions, it can give no assurance that its expectations will be achieved. Forward-looking information is subject to certain risks, trends, and uncertainties that could cause actual results to differ materially from those projected.

The Fund may participate in new issuances of securities ("New Issues"), and a portion of the Fund's returns consequently may be attributable to its investment in New Issues. The market value of New Issues may fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, and the limited availability for trading and limited information about the issuer. When a fund's asset base is small, New Issues may have a magnified impact on the Fund's performance. As a fund's assets grow, it is probable that the effect of the fund's investment in New Issues on its total returns may not be as significant, which could reduce the Fund's performance. There is no guarantee that the availability or economic attractiveness of New Issues will be consistent from year to year.
