Fund Objectives

Japan Smaller Capitalization Fund, Inc. ("JOF" or the "Fund") is a non-diversified, closed-end management investment company listed on the New York Stock Exchange ("NYSE"). The Fund's investment objective is to provide shareholders with long-term capital appreciation and to invest, under normal circumstances, at least 80% of its total assets in smaller capitalization Japanese equity securities traded on the Tokyo, Nagoya, and JASDAQ Stock Exchanges, the Mothers, Centex Markets, and other indices

or markets determined by the investment adviser to be appropriate indices or markets for smaller capitalization companies in Japan. Nomura Asset Management U.S.A. Inc. has served as the Fund's Manager since the Fund's inception in 1990. Nomura Asset Management Co., Ltd. has served as the Fund's Investment Adviser since the Fund's inception. The Manager and Investment Adviser are subsidiaries of Nomura Holdings, Inc. and affiliates of Nomura Securities Co., Ltd., Tokyo, Japan.

Market Commentary

As expected, we saw a reversal in the dominance of growth stocks in the Japan equity market in June 2021 against the backdrop of calmer US long-term interest rates. However, we expect the inflow of cash into value stocks to continue over the medium to long term. Once started, the correction of this historically wide valuation gap between value and growth stocks will be hard to stop.

Compared to large-cap stocks, the small-cap value stocks are still lagging behind. Among the small-cap value equity universe, stocks with relatively large market capitalization have begun to move along in tandem with the movement of large-cap value stocks.

As for the rebound in value stocks that we saw until the early spring of this year, it might be more appropriate to describe that as a rebound in high-beta external demand oriented companies, whether they were large-cap or small-cap stocks in our view. At the time, stocks with relatively weak balance sheets posted the strongest rebounds. In that sense, Japanese small-cap value stocks are generally more dependent on domestic demand and have lower beta. Hence, it has been difficult for value stocks to rebound under current conditions. In addition, it seems that investors are avoiding small-cap stocks with low liquidity due to speculation about the reclassification of stocks listed in the TOPIX index. However, corporate

fundamentals rather than broad market factors determine stock prices in the end. Currently, the most undervalued stocks in Japan are domestic demand oriented small value stocks. We believe the flow of funds will eventually head their way. Moreover, these stocks have stronger balance sheets. We believe their low beta reflects this low financial risk and we see this as a significant investment opportunity.

In Japan, the Covid-19 vaccination rollout has been delayed, but it is now catching up and time will hopefully solve the problem. Therefore, the time will come when attention focuses on the revival of domestic demand oriented companies in the value cycle.

Additional Information

Comparisons between changes in the Fund's net asset value or market price per share and changes in the Fund's benchmark should be considered in light of the Fund's investment policy and objective, the characteristics and quality of the Fund's investments, the size of the Fund, and variations in the Japanese Yen/U.S. Dollar exchange rate.

This report is for informational purposes only. The financial information is taken from the records of the Fund without examination by independent accountants. The portfolio information found in this report is as of the date of this brochure and is subject to change at any time without notice. This report is not a prospectus, circular or representation intended for use in the sale of shares of the Fund or of any securities mentioned in this report. Past performance is not indicative of future results. Current performance may be lower or higher than the performance presented. Investment products offered are not FDIC insured, may lose value, and are not bank guaranteed.

The Russell/Nomura Small Cap™ Index represents approximately 15% of the total market capitalization of the Russell/Nomura Total

Market™ Index. It measures the performance of the smallest Japanese equity securities in the Russell/Nomura Total Market™ Index. The Nikkei JASDAQ Stock Average Index is a capitalization-weighted index of all Japanese over-the-counter stocks. The TOPIX is a market capitalization-weighted index of all companies listed on the First Section of the Tokyo Stock Exchange. Any performance quoted should not be viewed as a representation of future investment performance. There is a risk of loss. One cannot invest directly in an index.

This material contains the current opinions of the Fund's manager, which are subject to change without notice. It should not be considered investment advice. Statements concerning financial market trends are based on current market conditions, which will fluctuate. There is no guarantee that these investment strategies will work under all market conditions, and each investor should evaluate their ability to invest for the long term.

Forward Looking Statements. Certain information discussed in this factsheet may constitute forward-looking statements within the meaning of the U.S. federal securities laws. Although the Investment

Manager of the Fund believes that the expectations reflected in such forward-looking statements are based on reasonable assumptions, it can give no assurance that its expectations will be achieved. Forward-looking information is subject to certain risks, trends, and uncertainties that could cause actual results to differ materially from those projected.

The Fund may participate in new issuances of securities ("New Issues"), and a portion of the Fund's returns consequently may be attributable to its investment in New Issues. The market value of New Issues may fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, and the limited availability for trading and limited information about the issuer. When a fund's asset base is small, New Issues may have a magnified impact on the Fund's performance. As a fund's assets grow, it is probable that the effect of the fund's investment in New Issues on its total returns may not be as significant, which could reduce the Fund's performance. There is no guarantee that the availability or economic attractiveness of New Issues will be consistent from year to year.
